A D3 pie chart in Angular. Creating a scatter plot. The last type of data visualization you'll create for this tutorial is a scatter plot. Scatter plots give us the ability to show the relationship between two pieces of data for each point in the graph. In this case, you'll look at the relationship between the year that each framework was released and the number of stars it currently has.

This is because data visualization professionals frown on the usage of pie charts to represent data. This is because of the human eye cannot visualize circular distances as accurately as linear distance. Simply put- anything that can be put in a pie chart is better represented as a line graph. However, if you like pie-chart, use:

Look at the visualization above and note how much the widths of the CIs vary. They can still be narrow but far away from the true mean. The take home message is that we must accept that our data are noisy and that our results are uncertain. A single “significant” CI or p-value might provide comfort and make for easy conclusions. I hope this visualization shows that instead of drawing ...
