Scenario planning, also called scenario thinking or scenario analysis, is a strategic planning method that some organizations use to make flexible long-term plans. It is in large part an adaptation and generalization of classic methods used by military intelligence.. The original method was that a group of analysts would generate simulation games for policy makers.

Scenario Analysis and Planning. Scenario analysis and planning is a useful tool for exploring plausible futures of SES (Bengston et al., 2012). The role of scenario analysis and planning is to look at various future states of a system operating under uncertainty and generate strategies to meet potential management challenges (Peterson et al., 2003). Often the development of scenarios is used ...

CEO vacancies can be planned or unplanned; in either scenario, by the time a succession plan is needed it is far too late to start building one. Because of this, it is the responsibility of the board to make succession planning a priority, even in the face of more immediate and tangible issues. In addition to being necessary for risk mitigation, succession planning brings with it several ...
