Students study the materials and designs used in construction tasks. They compare paper, clay, cardboard, styrofoam or other available materials to see which are the strongest-which ones resist bending, crushing or tearing- and which are most easily shaped and joined. They test different shapes and thicknesses to find out what makes a structure strong and stable and to find out how much ...

The study caused an uproar, with many decrying Milgram's methodology as unethical — participants were not made aware that they were being studied. Many others expressed shock over the findings. Such behavior may perhaps help to explain, Milgram suggested, how ordinary Germans helped perpetuate the Holocaust. It is noteworthy that Milgram was a one-time classmate of Phillip Zimbardo, who ...
